

Life-sized

MOOSE

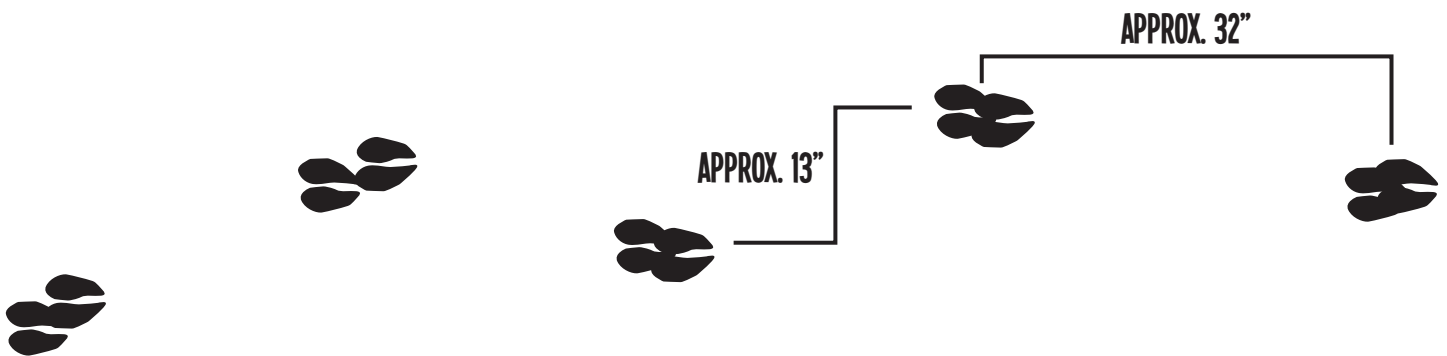

TRACKS

Kit Includes:

10' of animal track vinyl with floor grade, scuff resistant overlamine.

Plastic Squeegee

Mounting instructions

To Apply:

1. Cut each track set out from the sheets provided.
2. Using the measurements above, position each track on the floor.
3. Ensure the floor is clean, dry and free of dust or grease.
4. Peel off the backing paper and position the track lightly on the floor.
5. Starting in the middle of the track, squeegee out to the edges in each direction to adhere the track to the floor. Hold the squeegee at a 45 degree angle to the floor and exert medium pressure.
6. Peel off the clear transfer paper from the track.
- 7, Allow track to cure for 24 hours before walking on or cleaning.

To Remove:

Gently heat track with a hair dryer and peel away from the floor.

Because the tracks are opaque, they may leave a ghost image when removed as the track prevents fading and wear of the floor underneath it while the surrounding floor will fade and wear over time.

Apply tracks to sound, smooth floors where surface is intact (no peeling or cracking paint or varnish).
